I.F.A.S. - UniCHICK PRODUCTION

Hatcheries produced 267 million chicks during February, 3 percent above a year earlier, according to the Crop Reporting Board. The February broiler-type hatch of 227 million was up 3 percent from a year earlier. The January-February total broiler-type hatch was up 3 percent from the same period in 1968. Broiler-type eggs in incubators on March 1 were 7 percent above March 1, 1968. The revised hatch of broiler-type chicks during 1968 totaled 2,799 million compared with 2,759 million during 1967.

Egg-type chicks hatched during February at 40 million were up 3 percent from a year earlier. The North Central was up 2 percent, the South Atlantic up 16 percent and the West up 3 percent. The North Atlantic was down 2 percent and the South Central was down 4 percent. Hatch for the first 2 months of 1969 totaled 77 million, up 7 percent from the same months a year earlier. Egg-type eggs in incubators on March 1 were 3 percent below a year ago. The revised number of egg-type chicks hatched in 1968 totaled 514 million, 4 percent under 1967.

POULT PRODUCTION

Production of all breeds during February totaled 10,054,000 poult, up 13 percent from a year earlier. Heavy breed hatch at 9,429,000 was up 14 percent, while light breed hatch at 625,000 was down 8 percent. Total hatch during the first 2 months of 1969 was 15,978,000, 14 percent above the same period in 1968. The number of turkey eggs in incubators on March 1 was up 1 percent from a year earlier. The revised 1968 annual poult hatch for all breeds was 114,115,000 poult, 18 percent below the record hatch of 1967.

Chicks hatched by commercial hatcheries, United States

Number of hatcheries and egg capacity, January 1, 1969

The number of chick hatcheries operating in the United States on January 1, 1969 was 1,486 compared with 1,932 on January 1, 1967 and 2,365 on January 1, 1965. Current egg capacity of these hatcheries was 453,669,000 compared with 468,143,000 two years earlier.

The number of chick hatcheries decreased in all regions during the past two years. Egg capacities were down in all regions except the South Atlantic and South Central regions which were up 5 and 3 percent respectively. Hatcheries with egg capacity of 500,000 and over increased in both number and capacity from 1967 to 1969. This group accounted for 61 percent of the total egg capacity on January 1, 1969, up from 54 percent on January 1, 1967.

The trend of fewer and larger turkey hatcheries continues. On January 1, 1969 there were 303 hatcheries operating--26 percent fewer than two years earlier. During this period egg capacity declined from 56,983,000 to 53,763,000. Hatcheries with capacities of 500,000 and over increased in both number and egg capacity between 1967 and 1969. Turkey hatcheries having capacities of 100,000 to 499,999 eggs declined in both number and capacity since January 1, 1967.
